■ Concept of the Program

For this program, we have focused on "pulmonary fibrosis" in order to broaden the understanding of "lung sarcoidosis and other cause of interstitial lung diseases" and deepen its understanding. A world-class lecturer will give comprehensive and easy-to-understand lectures from the basics to the latest topics on the three perspectives should know now for working on pulmonary fibrosis and sarcoidosis research: "Future Aspects of the Concept", "Management of Progressive Disease Behavior" and "Pathogenesis and Biomarker". In addition, providing practical information that can be used for future research through a panel discussion on "Thinking of Etiological Diversity and Key Issues of UIP Pattern".

■ Contents of Program (tentative)

Educational Seminar 1

Future Aspects of the Concept of Progressive Pulmonary Fibrosis

Lecturer: Ganesh Raghu (University of Washington Medical Center, USA)

Educational Seminar 2

Management of Progressive Disease Behavior in Pulmonary Fibrosis

Lecturer: Athol Wells (Royal Brompton Hospital, UK)

Educational Seminar 3

Pathogenesis and Biomarker of Pulmonary Fibrosis

Lecturer: Gisli Jenkins (University of Nottingham, UK)

Panel Discussion

Thinking of Etiological Diversity and Key Issues of UIP Pattern

Panelist: Ganesh Raghu (University of Washington Medical Center, USA)

Athol Wells (Royal Brompton Hospital, UK)

Gisli Jenkins (University of Nottingham, UK)
